

How we protect you from **vectors**

A **vector** is any animal that can transmit disease or produce human discomfort or injury. The **Marin/Sonoma Mosquito and Vector Control District's** mission is to protect the public from vectors and vector-borne disease through surveillance, control, and public education.

District Services

Mosquito Control

Residents experiencing a mosquito problem may request service.

Mosquitofish

Free delivery of mosquitofish for permanent ponds or other water features.

Yellowjacket Control

Treatment of in-ground yellowjacket nests.

Rodent Advice and Inspections

Residents may call for advice or to schedule an inspection.

Public Outreach/School Program

Distribution of information at fairs, events, parks, and city/county offices, and presentations to groups. Free in-class vector presentations are available for grades K-8 throughout the school year.

Our programs and services are funded through property tax and benefit assessments and are provided at no additional charge to residents of Marin and Sonoma counties.

Request service or report mosquito issues at 707-285-2200 or www.ms mosquito.org
